Fast and easy...

The Spiral Pro model 2010 by PPI makes it easy to produce rigid spiral metal pipe from a variety of materials.

Computerized pipe dimensions and "touch screen control" data adjustments ensure uniform pipe size every time.

Plasma Torch Cut Off eliminates the need for costly slitting wheel sharpening, associated maintenance and ultimate replacement.

Spiral Pro *by* PPI

create perfect spiral pipe with less labor...

The Spiral Pro model 2010 by PPI is an automated system for producing rigid spiral metal pipe from 4 inches (100 mm) in diameter up to 100 inches (2,500 mm) in diameter.

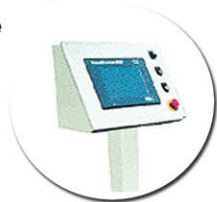

This versatile machine enables you to manufacture pipe from a variety of materials including aluminum and galvanized steel up to 14 ga. (2.0 mm) and stainless steel up to 18 ga. (1.2 mm).

Material through-put speeds:
0 - 240 fpm for 18 ga. - 26 ga.

0 - 120 fpm for 14 ga. - 16 ga.

Computerized pipe dimensions and adjustment data ensure uniform pipe size every time.

Touch screen control provides quick and easy data input and simple overall machine operation.

Add versatility to your system with our...

spiral duct forming heads

Spiral Duct Forming Heads are for producing rigid spiral metal from 4 inches in diameter up to 100 inches in diameter (metric sizes from 100 mm to 2,500 mm). This versatile tooling is Teflon-lined and requires less lubrication than conventional forming heads, allowing new pipe to be painted or shipped with less labor-intensive clean up, greatly improving your efficiency and minimizing your lubricant costs.

Flanger Pro

The Flanger Pro is a system for manufacturing round and flat oval flanges. This versatile machine enables you to manufacture flanges for connecting round and flat oval pipe and fittings.

Computerized touch screen controls allow the user to program the diameters (major and minor if flat oval) and ensure uniform flange size every time. The Flanger Pro's easy operation and fast production speeds will greatly improve your efficiency.
